Abstract The purpose of this study was to determine the effect of a 12-week, low-intensity, supervised walking program on the physical and psychological health of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were 40 sedentary, middle-aged women who were randomly assigned to either a supervised walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 20 women who did not participate in the walking program. The subjects were assessed at baseline and at 12 weeks. The walking program had a significant positive effect on the physical and psychological health of the subjects. The walking program significantly improved the subjects' physical health, as measured by the 6-minute walk test, and their psychological health, as measured by the Beck Depression Inventory and the State-Trait Anxiety Inventory. The walking program also had a significant positive effect on the subjects' quality of life, as measured by the SF-36. The walking program was well tolerated and had no adverse effects. The results of this study suggest that a supervised walking program can be an effective intervention for improving the physical and psychological health of sedentary, middle-aged women.

Figure 1: Schematic representation of the experimental design. The figure is divided into two main sections: 'Pretest' and 'Main Experiment'. The 'Pretest' section includes 'Pretest 1' (with 'Pretest 1a' and 'Pretest 1b') and 'Pretest 2'. The 'Main Experiment' section includes 'Main Experiment 1' (with 'Main Experiment 1a' and 'Main Experiment 1b') and 'Main Experiment 2'. Each section shows a sequence of steps: 'Stimulus presentation', 'Response', 'Feedback', and 'Inter-trial interval'. The 'Pretest' section shows a sequence of 'Stimulus presentation' and 'Response' steps, while the 'Main Experiment' section shows a sequence of 'Stimulus presentation', 'Response', 'Feedback', and 'Inter-trial interval' steps. The 'Pretest' section also includes a 'Pretest 1a' and 'Pretest 1b' section. The 'Main Experiment' section includes a 'Main Experiment 1a' and 'Main Experiment 1b' section. The 'Pretest' section also includes a 'Pretest 2' section. The 'Main Experiment' section includes a 'Main Experiment 2' section. The 'Pretest' section also includes a 'Pretest 1a' and 'Pretest 1b' section. The 'Main Experiment' section includes a 'Main Experiment 1a' and 'Main Experiment 1b' section. The 'Pretest' section also includes a 'Pretest 2' section. The 'Main Experiment' section includes a 'Main Experiment 2' section.
