Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses for all groups. The number of correct responses was significantly higher than the number of incorrect responses for all groups. The number of correct responses was significantly higher than the number of incorrect responses for all groups.

Figure 1 consists of two parts. Part (a) is a side-view schematic of a participant seated in a car seat. The participant is holding a steering wheel and a control lever. A display is positioned in front of the participant. Part (b) is a top-down view of the car seat and the control lever, showing the participant's position relative to the steering wheel and the control lever.
